Raising the Standard of Supervised Work

01 · Introduction

JurisOne began with a simple conviction: AI should make lawyers more accountable, not less. In 2027 we take that conviction from London to Europe, the United States and, by the end of the year, Dubai — one platform where every answer is cited and every output carries a named lawyer's sign-off.

WHERE IT STARTED

A small team of lawyers, and a big idea

We are lawyers first. We spent years watching brilliant people lose their evenings to work a machine could prepare, and watching AI tools arrive that nobody could stand behind.

So we built the tool we wanted: one that reads the matter, cites every source, and holds every output until a named lawyer signs it off. On 1 October 2026 we opened it to firms.

Our dream is not to replace lawyers. It is to give every firm — a two-partner high-street practice or an international team — the leverage once reserved for the largest.

1.10.26

JurisOne launched on 1 October 2026.

WHAT WE BELIEVE

Four principles we will not trade for growth

01

A named lawyer signs

Nothing leaves JurisOne for a client until a named, qualified person has approved it. The Supervision Gate is architecture, not a setting.

02

Every claim is cited

Answers point to the page and passage they came from. If the documents do not say it, Juris says so instead of guessing.

03

Data stays where it belongs

Client data is hosted in the UK and EU and is never used to train public models. Each new region gets its own hosting.

04

Built by lawyers

Our knowledge base is written and signed off by qualified lawyers, practice area by practice area.

> “AI should make lawyers more accountable, not less. That is the whole idea.”

The JurisOne founding team

Where We Begin

02 · Year Zero

We start 2027 with a complete platform for UK firms: matter-aware AI, a secure Vault, shared Spaces, 160 supervised agents and an Outlook inbox that drafts replies for review. This is the foundation we will carry abroad.

JurisOne at Launch

160

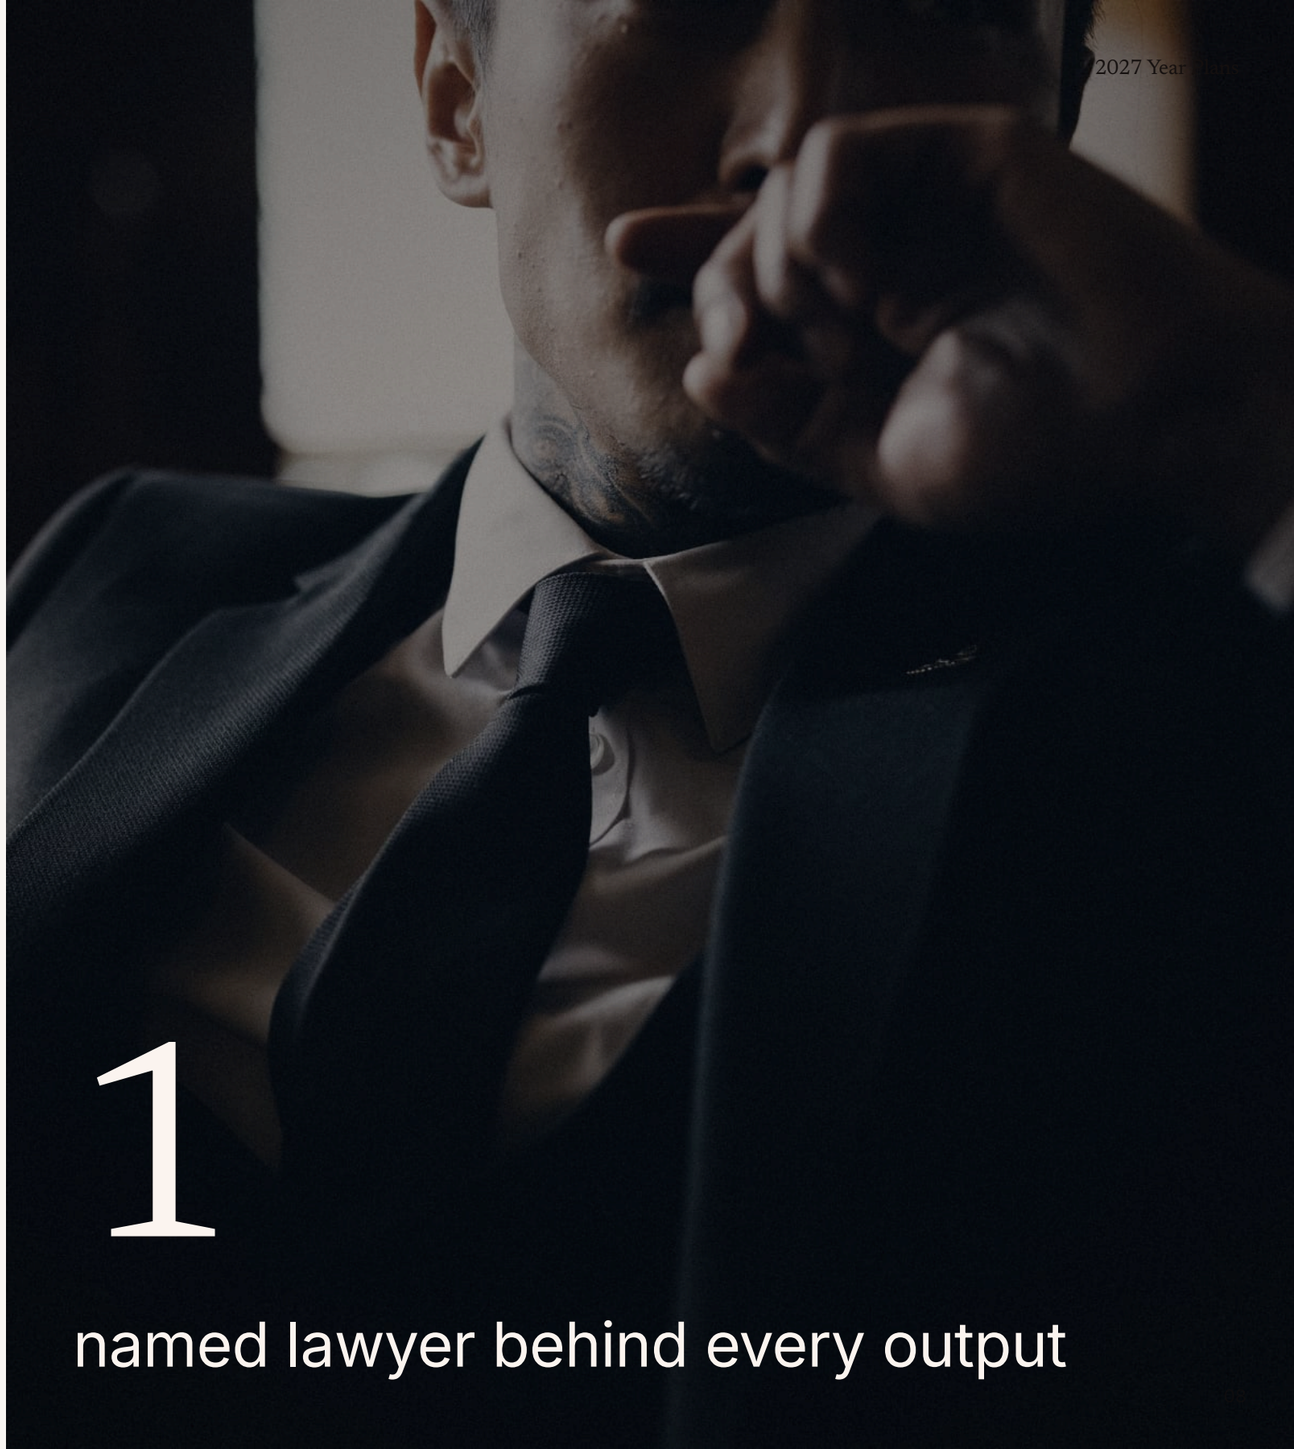

Supervised legal agents, each cited and signed off

11

Practice areas, from conveyancing to the Court of Protection

£149

One plan per fee-earner, including £100 of Juris AI usage every month

1

named lawyer behind every output

Every Practice, One Standard

Agents are organised the way firms are: by practice area, then by the work inside it.

Property

Residential, commercial and property disputes

Litigation

Civil litigation and criminal defence

Corporate

M&A, governance and commercial contracts

Risk & Compliance

AML, regulatory and data protection

Immigration

Business, personal and appeals

Employment

Tribunal and advisory

Banking & Finance

Lending, security and restructuring

Intellectual Property

Brands, licensing and disputes

Family

Finances, children and protection

Private Client

Wills, probate, trusts and the Court of Protection

Practice management

Intake, matter work and running the firm

Your firm

Firm-built agents arrive in 2027 — see page 15

One Platform for the Whole Firm

Everything a firm needs to run legal work with AI sits in one place, under one login, behind one gate. Each module reads the same matter file, so nothing is copied between tools and every answer can be traced back to its source.

Juris AI

Ask, research and draft against the matter file and the law — every answer cited.

Vault

Store, organise and question thousands of documents at once.

Spaces

Work with clients and the other side in secure, shared rooms.

Agents

160 agents that run legal work step by step and stop for sign-off.

Contract Intelligence

Every contract read on arrival: summary, key terms and risks, cited to the page.

Supervision Gate

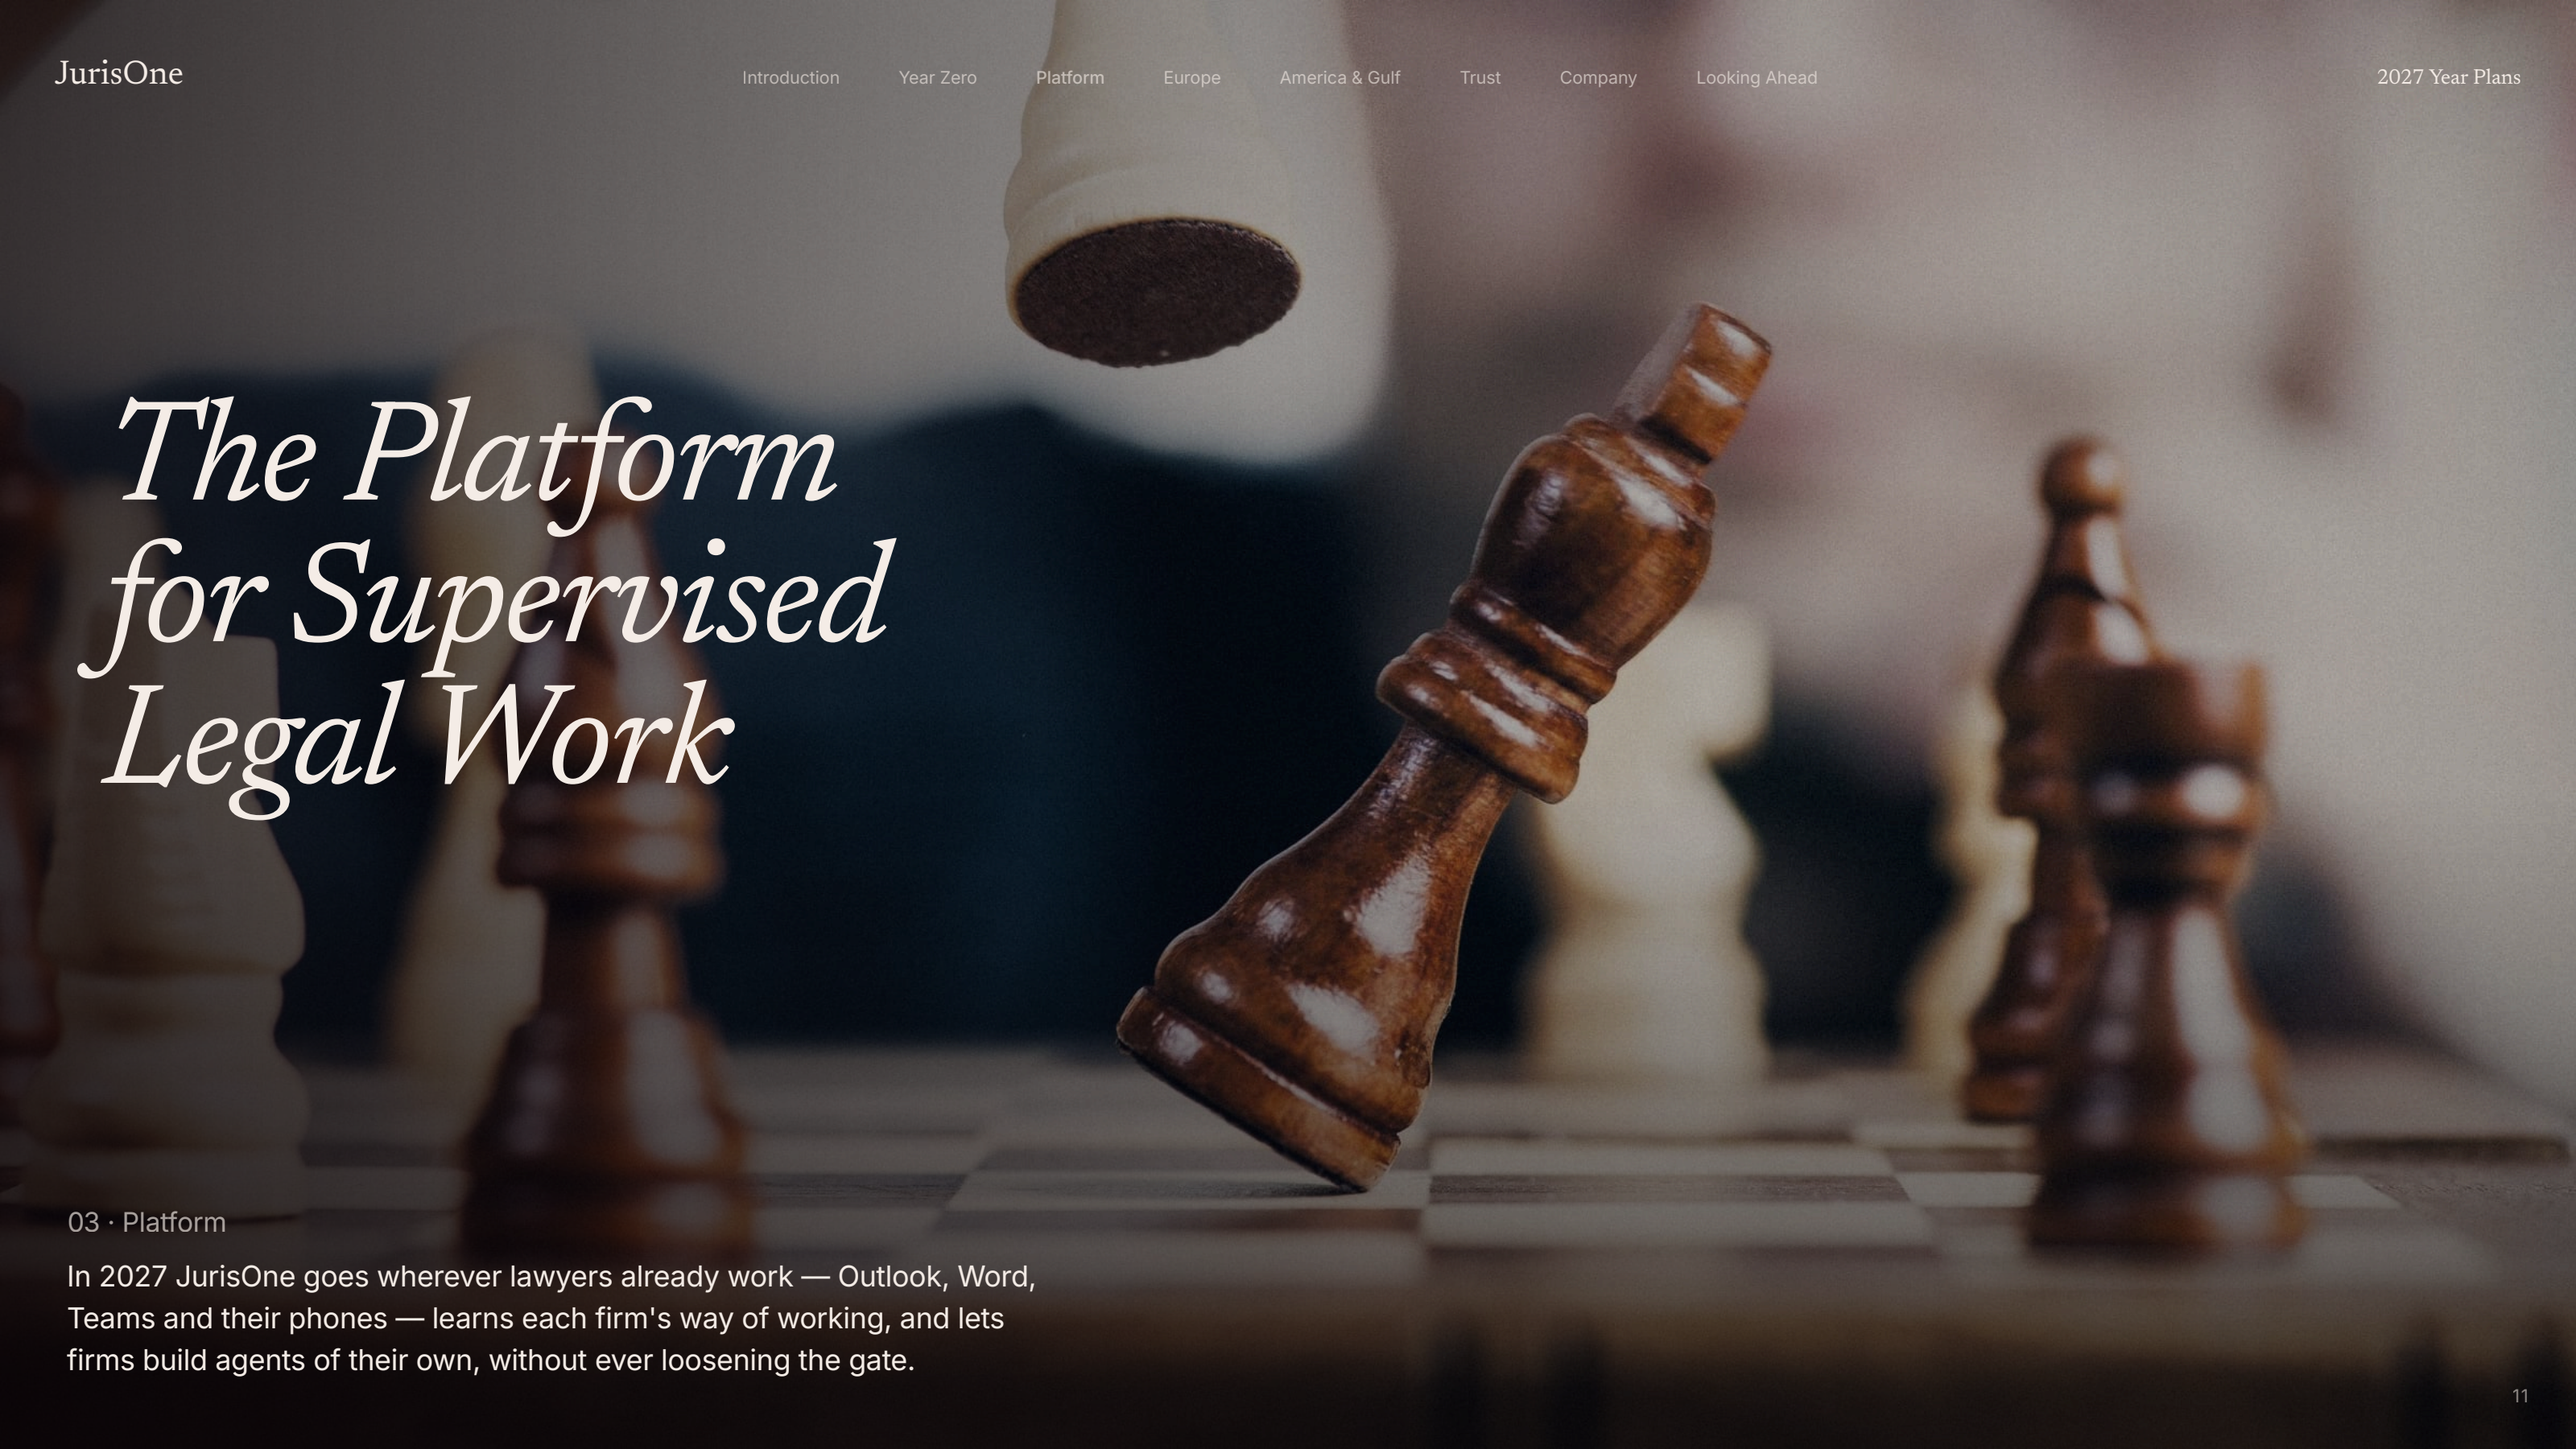

No client release without a named legal professional's approval.

Inbox

Outlook mail filed to matters, with replies drafted for review.

Command Centre

Usage, adoption and supervision at a glance for firm leaders.

The Platform for Supervised Legal Work

03 · Platform

In 2027 JurisOne goes wherever lawyers already work — Outlook, Word, Teams and their phones — learns each firm's way of working, and lets firms build agents of their own, without ever loosening the gate.

The 2027 Product Roadmap

Planned releases by quarter. Dates are targets and will move if quality needs them to.

Q1

Juris AI for Word
Draft and review inside the document

Firm agent builder
Firms turn their precedents into agents

Knowledge connectors
iManage, NetDocuments and SharePoint search

Q2

Practice packs: Ireland
Irish-law knowledge base, lawyer-signed

EU data region
Hosting inside the European Union

Spaces for clients
Guest access with matter-level permissions

Q3

German and French
Interface and drafting in both languages

Juris AI for Teams
Ask Juris inside the conversation

US data region
Hosting in the United States

Q4

New York practice packs
New York law, written by US attorneys

Dubai branch
Our base for the Middle East and North Africa

Arabic and English
Interface and drafting in both, right to left

Governance suite
Firm-wide policies, analytics and audit export

What We’re Building Next

COLLABORATION

Firms and clients working in the same Space across borders, with guest accounts, permissions and templates that make a new deal room a minute's work.

FIRM KNOWLEDGE

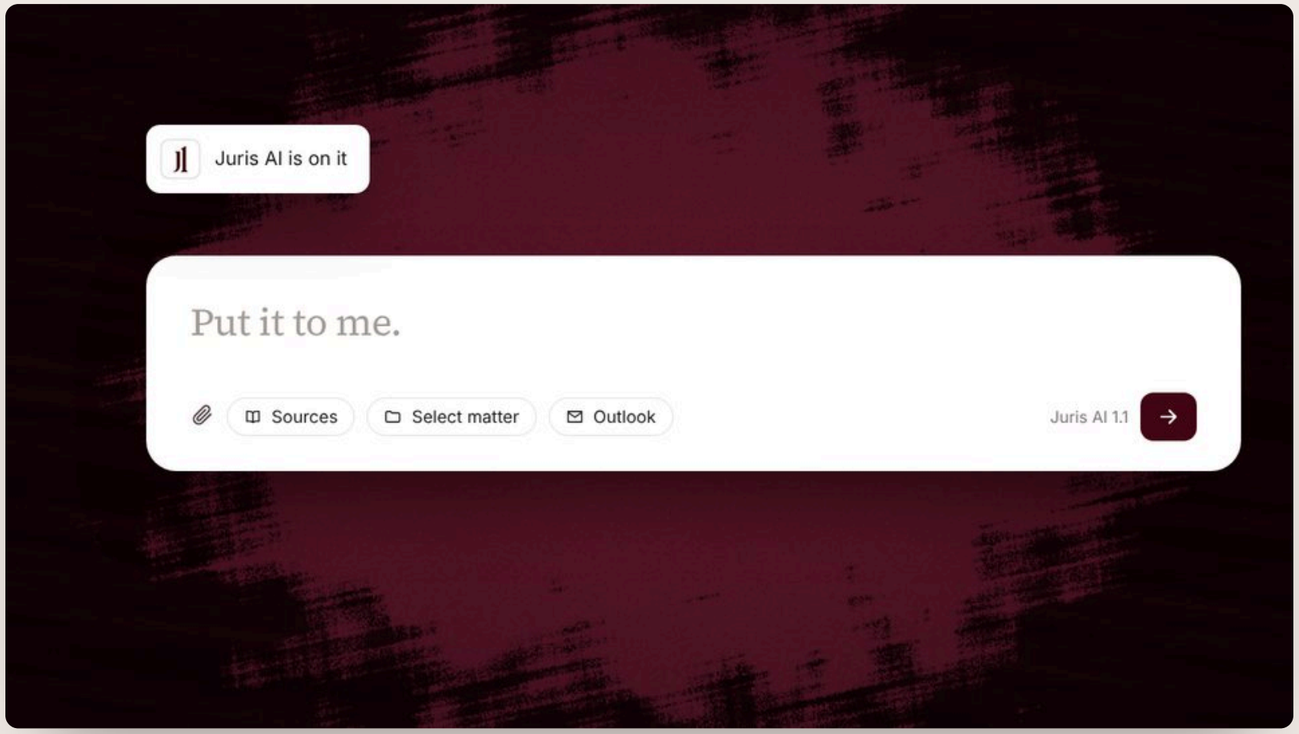

Juris learning how each firm works — its precedents, preferences and playbooks — so every draft reads like the firm wrote it.

GOVERNANCE

Firm-wide policies, supervision analytics and exportable audit trails that give partners and regulators a clear view of every AI-assisted step.

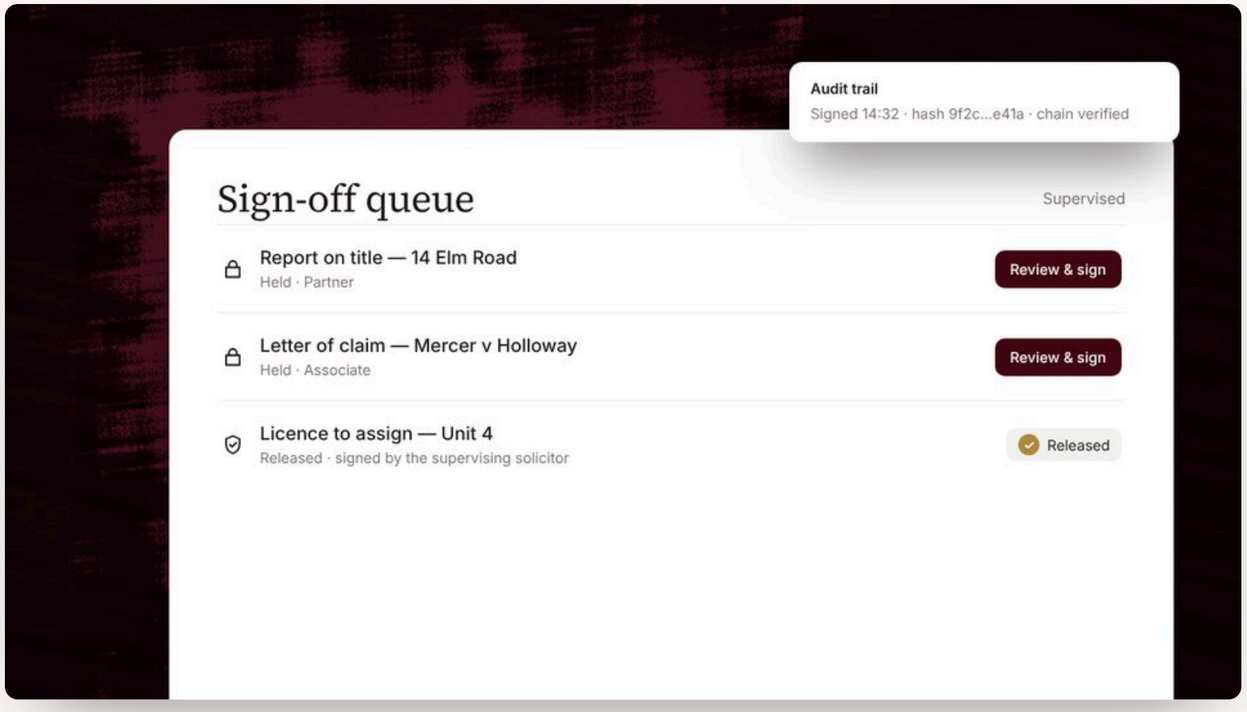

Juris AI, Wherever Lawyers Work

- **Outlook** — today. Mail filed to matters, replies drafted for review.
- **Word** — planned for Q1. Draft, compare and review clauses in the document.
- **Teams** — planned for Q3. Ask Juris in the chat, with the matter in context.
- **Mobile** — today. Review and sign off from anywhere, behind the same gate.

AGENTS

From 160 Agents to Every Workflow

We launch with 160 agents across eleven practice areas. In 2027 firms will build their own: a precedent, a checklist and a sign-off rule become an agent the whole firm can run.

Firm-built agents

Your playbooks, your steps, your reviewer.

Practice packs

Each new jurisdiction ships with its own lawyer-written agents.

Across the Channel

04 · Europe

Europe is our first step beyond the UK: a base in Dublin, then the Netherlands, France and Germany — each market opened with local lawyers, local law and data hosted inside the European Union.

Why Europe, and Why Now

We are opening Europe because our model already fits it. The same principles that make JurisOne trustworthy in London — named supervision, citations and data kept at home — are what European regulators and firms are asking for.

01

Close to home

Ireland shares the common-law tradition and much of the professional culture of England and Wales, so our supervised model translates directly. It is our natural first market in the EU.

02

Regulation favours our design

The EU AI Act asks for transparency and human oversight. Named sign-off, cited answers and a full audit trail are already how JurisOne works.

03

Firms work across borders

Our clients' deals and disputes already cross the Channel. A single platform that speaks each jurisdiction removes the seams between offices.

The European Route

Each market opens only when its knowledge base is written and signed off by lawyers qualified there.

TODAY

London

Home. UK practice packs across eleven areas.

Q2 2027

Dublin

EU base. Irish-law practice packs; EU data region.

Q3 2027

Amsterdam

Dutch and English. Corporate and commercial first.

Q3 2027

Paris

French interface and drafting. Corporate and disputes.

Q4 2027

Frankfurt

German interface and drafting. Corporate and finance.

Built for Each Jurisdiction

A market is not a translation. Each one gets its own knowledge base written by locally qualified lawyers, its own language for drafting, and hosting inside the European Union.

MARKET	LEGAL SYSTEM	LANGUAGES	WHAT WE BUILD FIRST	DATA
Ireland	Common law	English	Property, litigation and corporate practice packs	EU region
Netherlands	Civil law	Dutch, English	Corporate, commercial contracts and employment	EU region
France	Civil law	French	Corporate, disputes and compliance	EU region
Germany	Civil law	German	Corporate, finance and data protection	EU region

New York, Then the States

05 · America and the Gulf

The United States is the largest legal market in the world. We plan to enter it the way we built JurisOne: carefully, with US attorneys writing the law we rely on, starting in New York before going state by state. Towards the end of the year, we open a branch in Dubai.

A Careful Way In

- **New York first.** A centre of international finance and disputes, and a natural bridge for firms already working across the Atlantic.
- **US attorneys in the loop.** New York practice packs written and signed off by attorneys admitted there.
- **State by state, by the rules.** Each further state opens only when its knowledge base meets the same standard, following ABA Formal Opinion 512 and each state bar's guidance.
- **Hosted in the US.** A dedicated US data region, so American client data stays in America.

Late 2027 · Middle East and North Africa

Then the Gulf: a Branch in Dubai

Towards the end of 2027 we plan to open a JurisOne branch in Dubai — our base for the Middle East and North Africa, serving firms and in-house teams across the region with the same named supervision.

DIFC and ADGM first

The region's English common-law courts and free zones are our natural starting point, close to how we already work.

UAE law, signed off locally

Practice packs for UAE onshore law written and signed off by lawyers qualified in the Emirates.

Arabic and English

Interface, drafting and research in both languages, with right-to-left documents handled natively.

Then the wider region

Data hosted in the region, then Saudi Arabia, Qatar and the rest of the Gulf as each knowledge base is ready.

One Plan, Every Region

The same plan everywhere, shown in local currency — with Juris AI usage included every month.

UNITED KINGDOM

£149

per fee-earner, per month

EUROPEAN UNION

€173

per fee-earner, per month

UNITED STATES

$194

per fee-earner, per month

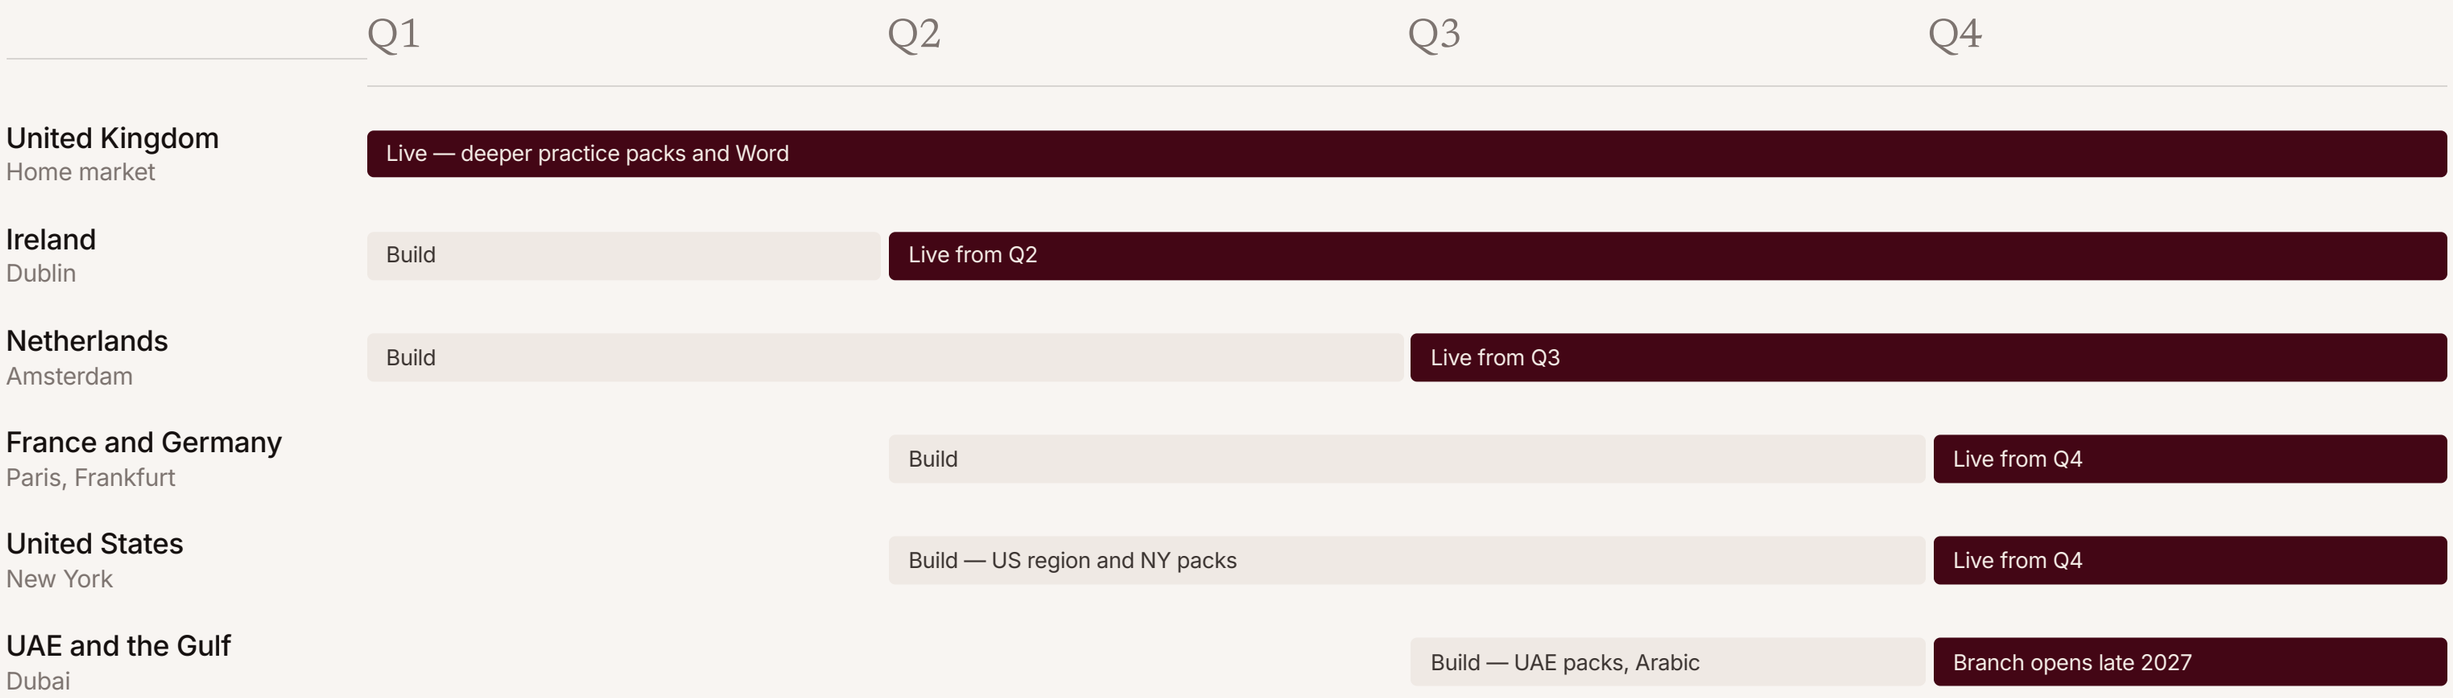

UAE, FROM LATE 2027

AED 712

per fee-earner, per month

2027 at a Glance

Build means knowledge base, language and hosting in preparation. Live means open to firms.

Trust You Can Inspect

06 · Trust and governance

Growth across borders only works if trust travels with it. Every region we open inherits the same gate, the same audit trail and the same promise about client data.

The Trust Architecture

Four commitments hold in every region we operate. They are built into the platform itself, so they do not depend on a setting being switched on or a policy being followed.

Supervision Gate

No output reaches a client without a named legal professional's approval — enforced by the platform, not by policy.

Hash-chained audit

Every step is recorded in a tamper-evident audit trail a firm can export for its regulator or client.

Data residency

Hosted in the UK and EU today; a US region opens with our US launch. Data stays in the region it belongs to.

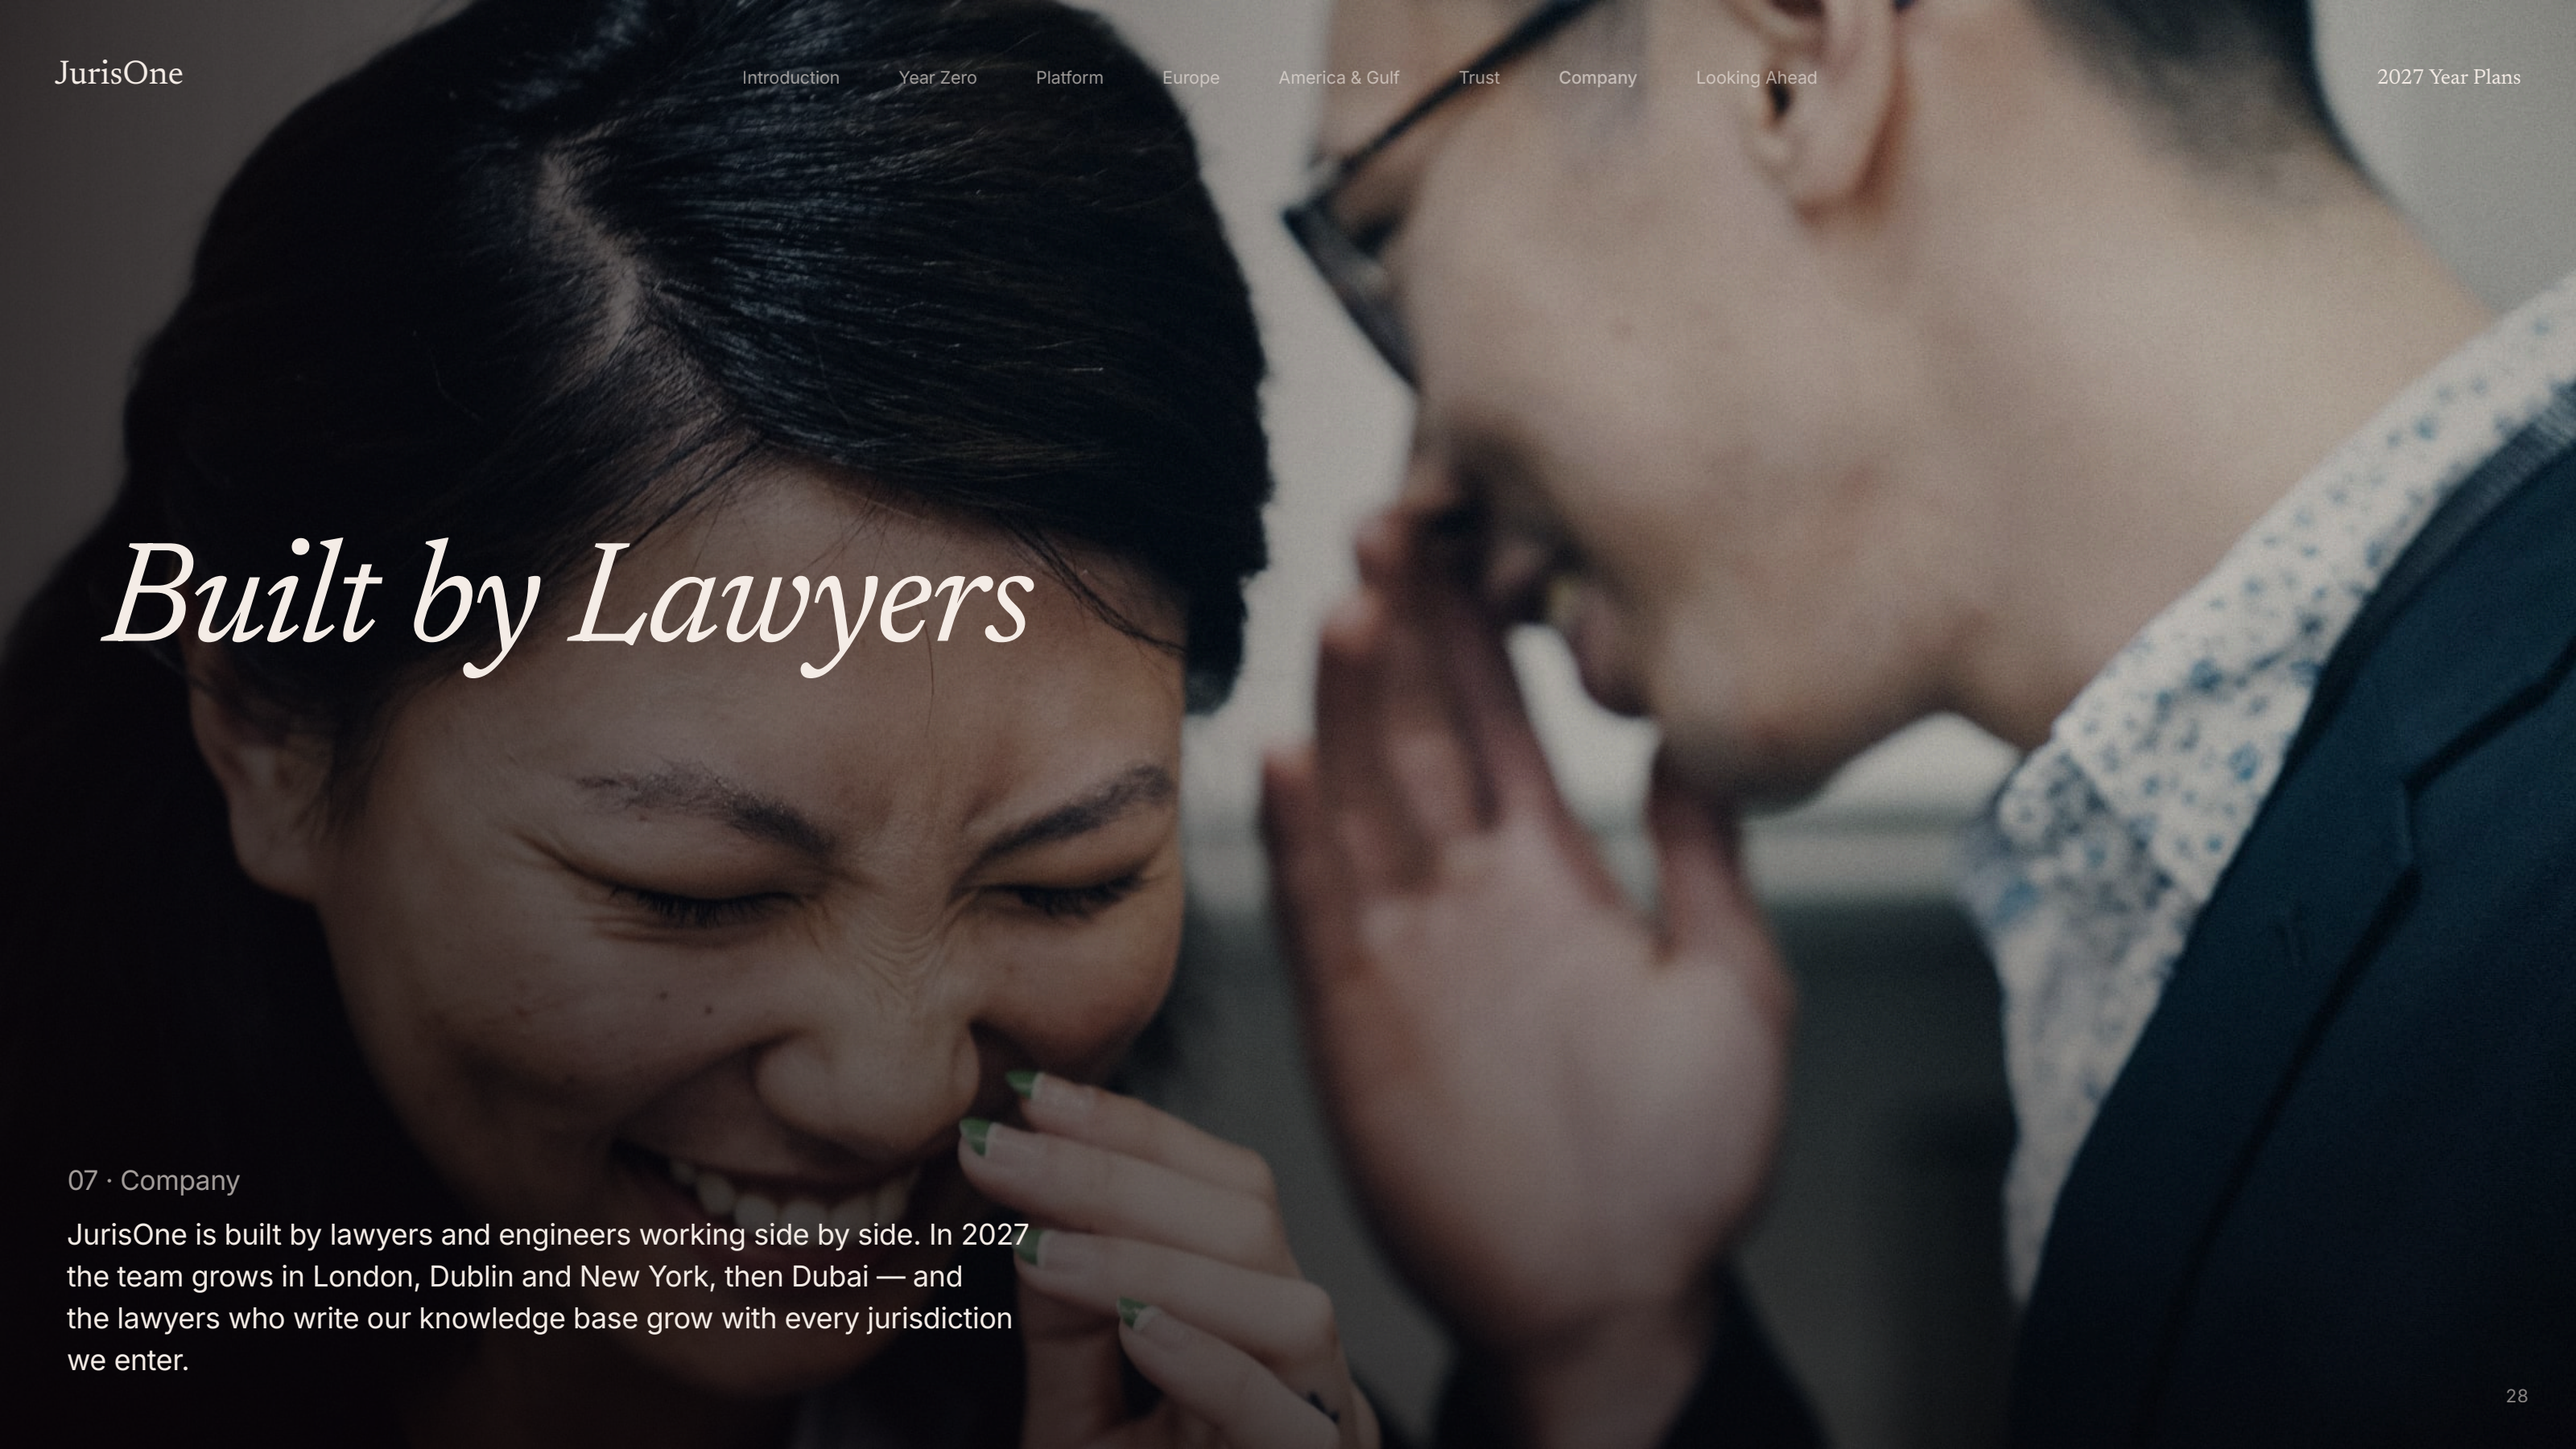

Never trains public models

Client documents and prompts are never used to train public AI models. Our controls are Cyber Essentials certified.

Regulation in Every Market

Each market has its own rules. JurisOne does not ask firms to choose between innovation and compliance: the controls regulators expect are already part of how the platform works.

REGION	WHAT APPLIES	HOW JURISONE MEETS IT
United Kingdom	SRA Standards and Regulations; UK GDPR and the Data Protection Act 2018	Named supervision, client-care support, UK hosting and an audit trail for file reviews
European Union	The EU AI Act; GDPR; national bar rules	Human oversight by design, transparency on every answer, EU hosting and local practice packs
United States	ABA Formal Opinion 512; state bar guidance; state privacy laws	Visible supervision, confidentiality controls, US hosting and state-by-state rollout

Built by Lawyers

07 · Company

JurisOne is built by lawyers and engineers working side by side. In 2027 the team grows in London, Dublin and New York, then Dubai — and the lawyers who write our knowledge base grow with every jurisdiction we enter.

The Team We’re Building

As we grow, we will keep the balance that defines us: lawyers and engineers in roughly equal measure, working on the same problems, side by side.

Legal knowledge

Lawyers qualified in each market we enter, who write and sign off each practice pack.

Engineering

Product and AI engineers building the platform, the gate and the regions it runs in.

Customer success

Former practitioners who help firms adopt JurisOne matter by matter.

Trust and security

Specialists in privacy, information security and regulatory assurance for every market.

Lawyers in the Loop, at Every Step

The knowledge Juris plans from is not scraped or guessed. It is written, reviewed and signed off by qualified lawyers — and every output still waits for the lawyer on the matter.

01

Written

Qualified lawyers write the risks, stages, required documents and enquiries for each practice area.

02

Signed off

A second lawyer reviews and signs off every entry before Juris can use it.

03

Cited

When Juris relies on the knowledge base or a document, it shows exactly where.

04

Approved

The output waits for the supervising lawyer on the matter. Nothing is released without them.

Where the Community Comes Together

From London to Lisbon, New York and Dubai, we will be where legal innovation is discussed.

NOVEMBER 2026

Web Summit

Property, litigation and private client

2027

JurisOne Students

Lectures, moots and mentoring

The Next Generation of Lawyers

JurisOne Students

Law students learn on JurisOne Students — lectures, moots, mentors and opportunities — so the lawyers of the next decade arrive knowing how to supervise AI, not just use it.

Into 2027

08 · Looking Ahead

In 2027 we will deepen what firms rely on, open Europe and the United States, plant our flag in Dubai, and keep one promise in every market: a named lawyer behind every output.

We started JurisOne because we believed AI could transform legal work — and because we had not yet met an AI tool we were prepared to sign our names under.

On 1 October 2026 we launched with a small team of lawyers and a large ambition: to give every firm the leverage of the largest, without ever asking a lawyer to trust an answer they cannot check.

In 2027 we take that ambition to Europe and the United States, and by the end of the year to Dubai. We will move as fast as quality allows and no faster. Each market will open with lawyers who know its law, with its data kept at home, and with the same gate that makes JurisOne what it is.

Thank you to the firms who trusted us first. Everything in these pages is built for you — and with you.
